Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 July 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 10, 13 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Solhjell et al(5,375,245).

Solhjell et al disclose an image display system comprising at least one display device(3) connected to a host device(1) wherein an image is displayed on the at least one display device in accordance with an image signal which is output from the host device; and the at least one display device monitors a state of coupling with the host device(based on absence or presence of synchronization pulses(4)).

As to the claims 13 and 16, Solhjell et al also teach that when the state of coupling with the host is canceled(i.e., in the absence of synchronization signals), each of the at least one display device independently administers power management thereof based on a prescribed setting(column 4, lines 14-68; column 5, lines 1-18; figure 5).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Solhjell et al in view of Mitchell et al(5,987,614).

Solhjell et al is discussed above. Mitchell et al is cited to show that the broad concept of providing power saving feature for an LCD display device is old(see figure 14). Thus, it would have been obvious to one of ordinary skill in the art to replace the CRT monitor(3) of Solhjell with an LCD display device, as evidenced by Mitchell et al, because both references are directed to power saving for a display device and further because Solhjell et al, at column 7, lines 6-22, teach that their system is capable of working with digital circuitry as opposed to analog CRT circuitry. Furthermore, substitution of one type of display device for another specific type of a display device is considered to be an equivalent alternative substitution, which is a matter of arbitrary design decision, well within the purview of one of ordinary skill in the art.

5. Claims 4-9, 11-12, 14-15, 17 and 18 are allowed.

6. Claims 2, 3 and 20-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Mike Fatahiyar** whose telephone number is **(703) 305-6911**.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Richard Hjerpe**, can be reached at **(703) 305-4709**.

Any response to this action should be mailed to:
